

Dear Micheal Powell & The FCC,

I am writing you to request that you reject the NAB's petition 04-160. XM radio is a pay service that I used on a daily basis, and it is not the NAB's place to dictate what those of us who pay to subscribe to XM should be able and not be able to hear. Just because the radio statations and television stations that give us weather and traffic can not do the job as well as xm, or not on the same level it does not give the NAB the right to justify something that does not fall under their association

Satellite radio provides variety and quality that are not available elsewhere. I for these services and it should not be up to the National Association of Broadcasters to dictate what you are permitted to hear

Thank You
